

Air Conditioning Block

Gelair™ Air Conditioning Block is the simplest way to stop mold and bacteria in your Air Handling Unit and Air Conditioning System. The patented technology in Gelair™ Air Conditioning Block delivers controlled and sustained Australian Tea Tree Oil vapour throughout the entire system, killing mold, bacteria and viruses.

Instructions for Installation

- ❶ Open the cover of the Air Handling Unit to reveal the cooling coil and fan.
- ❷ Remove the Air Conditioning Block from the foil package.
- ❸ Insert Air Conditioning Block into incoming air stream of Air Handling Unit - between the filter and the cooling coils.
- ❹ Pour any extra liquid from foil package into Air Handling Unit drip tray.
- ❺ Fix cover of Air Handling Unit back into position.

Gelair™ Air Conditioning Block will last up to 12 weeks depending on air conditioner use. The fresh Tea Tree Oil aroma may be stronger immediately after installation or when turning your unit on after a break.

Available sizes:

AB 0.5 • AB 1 • AB 2 • AB 4
